

POLYFLEX™ BACKBOARD

Overview

The PolyFlex™ Backboard is strong and durable, as it is made from a very tough, impact resistant, UV stabilized Poly material that is flexible and not brittle. Say "So Long" to bent corners.

The PolyFlex™ Backboard has a uniform colour throughout the thickness of the material, eliminating the fading, paint-peeling and cracking associated with aluminum backboards. Fortran provides a five year warranty against fading and cracking.

The Plumbized version of the PolyFlex™ backboards have two breakaway tabs. Break one tab to custom fit your signal head. The other tab blocks unwanted light from passing through.

The PolyFlex™ Backboard fits several major manufacturers' polycarbonate traffic signals, and is now accepted in most major cities and regions across Canada. It is also available as a retrofit for existing aluminum signal heads.

The PolyFlex™ can easily be washed to remove all types of dirt; just spray them down

Features

- Lightweight and Flexible
- Strong and Durable
- Maintenance Free
- Fits Most Manufacturers' Signals
- Washable
- Five Year Warranty
- Available with 3M Diamond Grade Reflective Tape

Specifications

- Material: UV Stabilized Polycarbonate
- Thickness: 0.135 inches (3.4 mm)
- Dimensions: Dimensions in inches (mm)
- Weight: Weight in lbs. (kg)
- Installation: Attaches to the back of the signal the head before mounting
- Colours: Traffic Yellow, Yellow/Grey Back, Black
- Mounting Hardware: Self tapping #10 stainless steel screws are supplied
